Mexico has urgent demand, but low budgets + a complicated gov't purchasing landscape. What can Virginia companies offer that helps their mission?

Mexico in relative terms

- 10th largest country globally
 - 125 million people (40% the population of USA)
- 11th largest economy
 - Between France + Korea in total market size (PPP)
- Shares with the USA:
 - Federal democratic republic structure of government
 - Integrated economic region (USMCA) + supply chains
 - Connected airspace, highways, power grid, pipelines, telecom
 - Intense border cooperation for trade + travel
 - Intense cooperation on regional security
 - Interconnected political + family histories
 - Mexico has 50 consulates in the United States
 - Language: including non-native speakers, US has more Spanish-speakers than every country in the world except Mexico

Market size: MX military

- Mexico's military budget hovers around 2% of total government budget, comparable to Switzerland's relative budget
- In absolute terms, Mexico ranked between Sweden + Oman for expenditure in 2019, spending about 6.5 billion USD
- Mexico's total military capex planned for 2020 is equivalent to about 10 billion USD

FMS: Mexico received 64% of its transfers in 2015-2019 from the US

- 10% from Spain
- 9% from France

Graphic: military spending as a percentage of GDP, 2019 (from Sipri-- color intensity denotes greater relative spending)

Mexico's Defense Cabinet

SEDENA

SECRETARÍA DE LA DEFENSA NACIONAL

The Army + Air Force

SEMAR

SECRETARÍA DE MARINA

The Navy + Marine Armada

Market size: MX law enforcement

Federal-level policing and investigation (Guardia Nacional) is currently part of the military budget

- The federal government provides annual subsidies to states and municipalities throughout the country, in 2020 equivalent to about 1.4 billion USD (28.8 billion MXN). The share of police organizations who rely on federal subsidies for all or most of their budgets is unknown.
- Some state entities, notably Nuevo Leon and Mexico City, have comparatively robust subnational investment in policing capabilities, ranging from new hiring, training and equipment to data fusion systems.
 - Nuevo Leon: 2020 budget destines about 300 million USD (5.9 billion MXN) to policing
 - Mexico City for policing 2020: about 2 billion USD (39 billion MXN)

>50% of municipalities in Mexico employ 10 or fewer police. 30% of police in surveyed districts aren't paid a living wage.

SESNSP administers federal subsidies to municipal police, under 2 funds:
FASP
FORTASEG

Military or law enforcement?

SSPC cabinet ministry is in charge of

- Public safety / disaster protection
- Government intelligence
- Public security
- National security
- Combating organized crime
- National police coordination
- Security support to states
- Federal penitentiary systems

For most of **20th century**, MX military focused on disaster relief

2006: MX military tasked with law enforcement role in “war” on drugs

While it may have been necessary for military to step in, this role is unconstitutional

2018: Public Security + Citizen Protection (SSPC) cabinet seat created, essentially revamping federal police

2019: National Guard created

Belongs legally to SSPC with federal police + military personnel, funded + operated by military

250 coordinating units nationwide

- **National Strategy for Peace + Security 2018-2024**
 - Implements previous administration’s creation of SSPC + National Guard: **SIGNIFICANT** area of continuity in an administration that has sought to eschew many other programs of its predecessors
 - Focuses on social, structural changes + development as a means to precluding violence, criminal activities
 - Rethinks drug policy with emphasis on supply side: cannabis in process of legalization, if successful may be a stepping stone to legalized poppy cultivation. Permits amnesty of individuals + groups in certain circumstances.
- **President AMLO’s austerity plan for government is a political + operational backdrop**
 - Austerity plan technically hasn’t lowered military peacekeeping budget
 - Focus for military austerity is via reducing waste related to inefficiency + corruption
 - Allocation of Sta Lucia airport to the military’s budget effectively does reduce money available for security programming

Military priorities through 2024

SEDENA

Continue staffing + dev of National Guard

Leadership + culture of the organization

Reducing corruption

Control + protection of National Airspace

Air Force + Special Forces intelligence

AF training: pilots, crews, maintenance

Aircraft maintenance process + automation

International + regional cooperation, e.g. FAMEX, training exchanges

Economic + sustainable dev goals

Intelligence: doctrine, training, purpose, R+D

Improvements to Cyberspace Operations Center

Drug + weapons interdiction

Drug crop eradication

UN CECOPAM in Mexico, for military, police, civilian training

SEMAR

National Maritime Authority: UNICAPAM units at maritime ports

Naval construction to help drive economic development

Improve well-being of personnel (health, education, human rights initiatives)

Regional security through multinational cooperation

See linked plan for detailed objectives related to digital information + intelligence

Return Armada focus from inland to coastal areas

Naval Police support inland in coordination with National Guard

Rule of law in maritime zones + coasts: expanded search, rescue, patrol stations

Apply naval industries + acquisition of air assets to better patrol coasts; interdiction

R+D through public, private + academic cooperation: see several projects here

Both organizations publish their strategies for the current presidential administration (linked on their names).

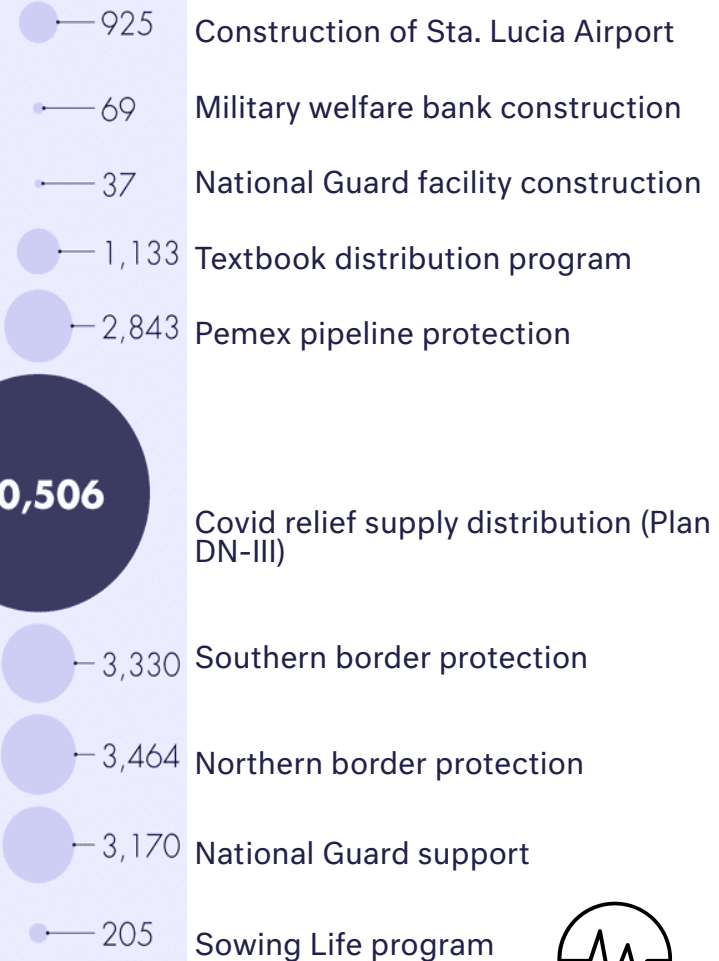

Recent SEDENA deployments + personnel assignation

DN-III is SEDENA's disaster relief program. Pictured: DN-III, and SEMAR, helped residents of New Orleans after Hurricane Katrina in 2005.

Personnel assigned

SEDENA CapEx 2020

As approved by the Mexican legislature ([link](#))

- 1) \$160 billion MXN (about 8 billion USD) total for calendar year 2020
- 2) Half is for a new airport at airbase Santa Lucia, which will be Mexico City's new major commercial airport
- 3) Examples of other investments approved for 2020 cycle:
 - 1) Long-range three-dimensional radars. Airspace management system (about 180 million USD)
 - 2) Transformation + upgrades of military industrial production infrastructure (about 1 billion USD)
 - 3) Aircraft: a C-295 outfitted for military transport, 6 EC-725 helicopters (about 900 million USD)

SEDENA CapEx planned

- Items requested but not approved in 2020:
 - Communication + telecommunication equipment
 - Technologies to implement phase 2 of the National Cyber Operations Center
 - Technological platform + equipment for data exchange

SEMAR CapEx 2020

As approved by the Mexican legislature ([link](#))

1) \$46 billion MXN (2.3 billion USD) total for Jan-Dec 2020

2) Example approved investments:

1) Aircraft for interception operations, “assets for surveillance operations,” naval hospital remodeling

3) Example items requested but not approved:

1) Construction of naval search + rescue stations, counterintelligence collection optimization equipment, technology to strengthen Armada intelligence’s data network, information platform for automating + monitoring maritime signaling

Significant military OpEx 2020

SEMAR + SEDENA both publish their detailed budgets (linked) as of the AMLO administration

- Medicines, vaccines (human + vet)
- Canine training
- Ground + marine vehicle operation + maintenance, fuels
- Maintenance of inspection equipment
- Tactical equipment
- Harris radio parts
- IT licenses + services
- Mobile satellite, Bicentennial satellite + public network communications

- Weather event prediction technology consulting
- Information services for air traffic control simulator
- Electronic flight instrument / navigation systems subscriptions + updates
- Support + logistics for 44 T-6 planes, Gulfstream G550, multiple Casa C-295s, Grob G120TP-A, 11 EC-725s + their engines, aircraft engine + other components / overhaul + parts, avionics courses, maintenance courses, pilot courses
- Information interpretation + analysis services
- Maintenance of manufacturing equipment

Characterizing policing demand

- Federally subsidized spending for municipal, state police aims to enforce accountability + professionalism
 - Both [FASP](#) + [FORTASEG](#) publish approved line items for which subnational police can use funds
- Strategic objectives of both funds:
 - Local institution capability building in public policy to prevent violence + crime, with a focus on community involvement
 - Development, professionalization + certification of police
 - Technology, equipment + infrastructure to support police operation
 - Penal justice reform implementation (national reform adopted 2006-2016)
 - Improving the penitentiary system including adolescent reform programs
 - Forensics development
 - National information coordination for security
 - National system for emergency + crime reporting
 - Improving ability to prevent + respond to “high impact” crimes
 - Specialized units for missing persons search

Mexico City Investigations: Case Study

With several challenges surrounding fragmentation of investigative data + intel, Mexico City in 2015 began internally building an information system that's accessible to both preventative (police) + investigative (prosecutor) bodies. The system has met myriad architectural + input problems, and is being improved currently. [InSight Crime](#) recently published an excellent, detailed article analyzing the situation. VEDP brought companies to meet with Mexico City police as they began the project originally, but budgetary + systemic constraints at the time did not favor hiring a contractor.

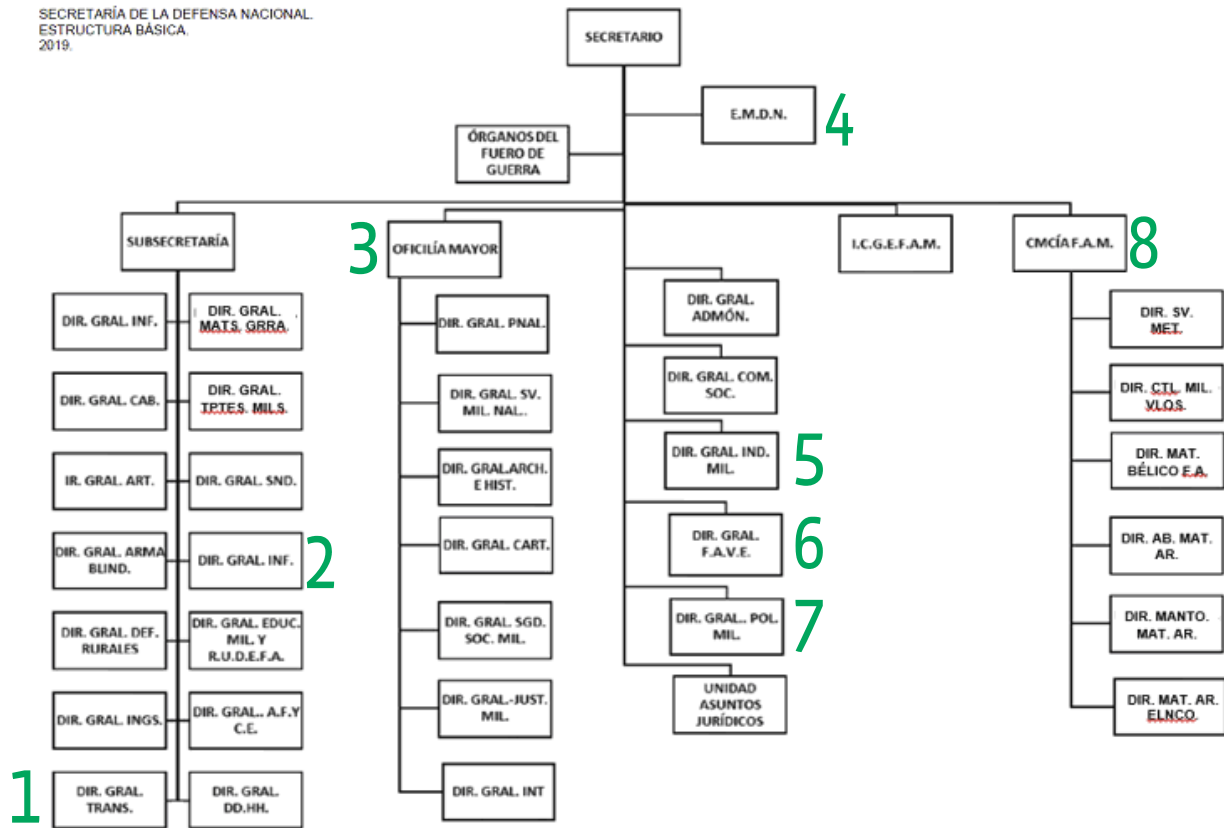

Important players

- SEDENA
- SEMAR
- SSPC + State Police
- Suppliers
- Associations + networking

SEDENA

SECRETARÍA DE LA DEFENSA NACIONAL.
ESTRUCTURA BÁSICA.
2019.

Units of common interaction for Virginia companies

- 1) Transmisiones = Signals
- 2) Informática = IT (enterprise)
- 3) Oficialía Mayor = Purchasing
- 4) Estado Mayor = Mission-Centered Capabilities
e.g. intelligence, logistics, doctrine, counternarco, probably the Cyber Operations Center
- 5) Industrias Militares = Military production
- 6) FAVE = Uniforms + Equipment production
- 7) Policía Militar = Military Police (Guardia Nacional)
- 8) FAM = Air Force
Meteorology, Flight Control, Air Materials (munitions, supply, maintenance, avionics)
SIVA =Air Surveillance System

SEDENA Military Industries

- 18 factories
 - Weapons, paints, cartridges, plastics, tools, clothing + equipment, heat treatment processes, freight, etc.
- After Pemex, organization with highest number of patents in Mexico

Example Air Force capabilities

SIVA Air Surveillance System

- Satellite detection of unpermitted aircraft
- 3 Embraer platforms, 2 King Air, plus Elbit Hermes drones
- 30 million USD investment over 3 years (2015-2018)

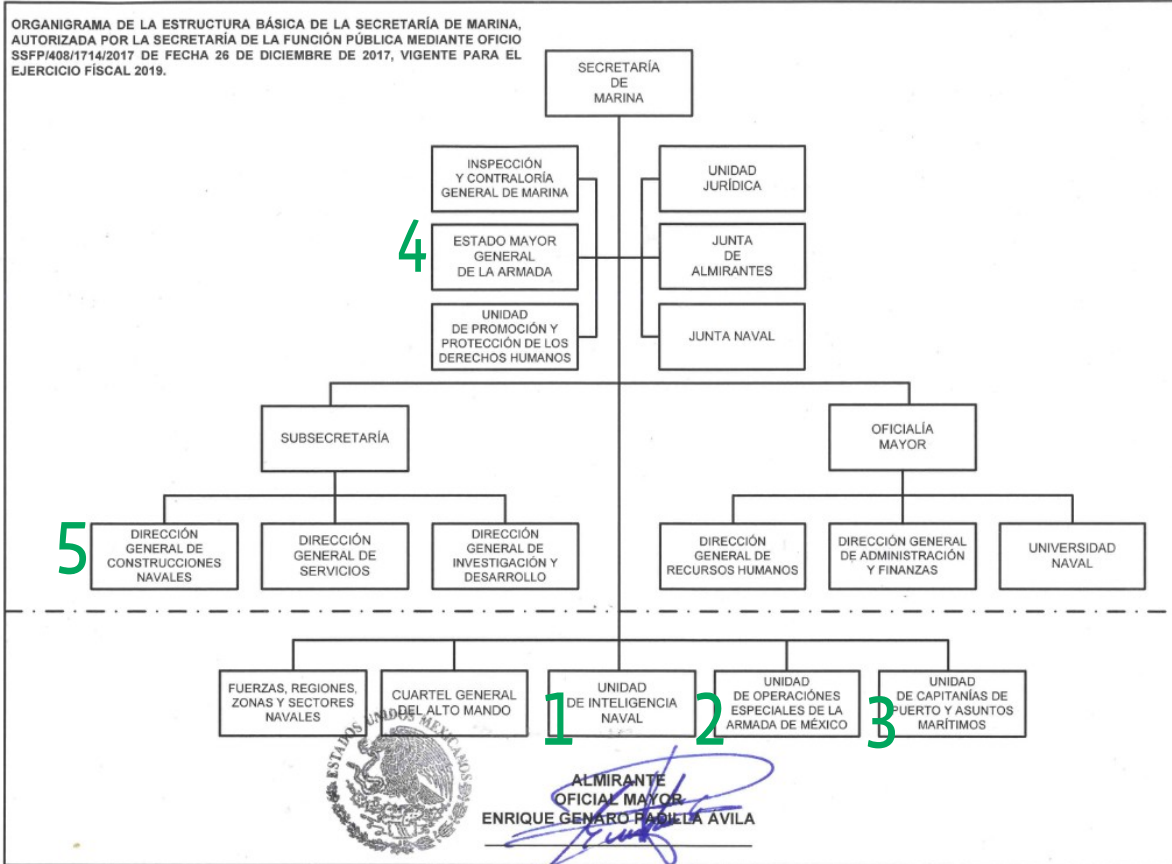

A list of the FAM's air assets can be found [here](#).

Feb. 2020, Infobae.

SEMAR

Areas of interest for Virginia Companies

- 1) UIN = Naval Intelligence
CEREGINAs + CERFI are regional intelligence centers
- 1) Operaciones Especiales = Special Operations
- 2) UNICAPAM = Maritime Port Security
- 3) Estado Mayor = Mission-Centered Capabilities (includes information security)
- 4) Construcciones Navales = Shipyards

Other units not on the chart that can be reached directly:

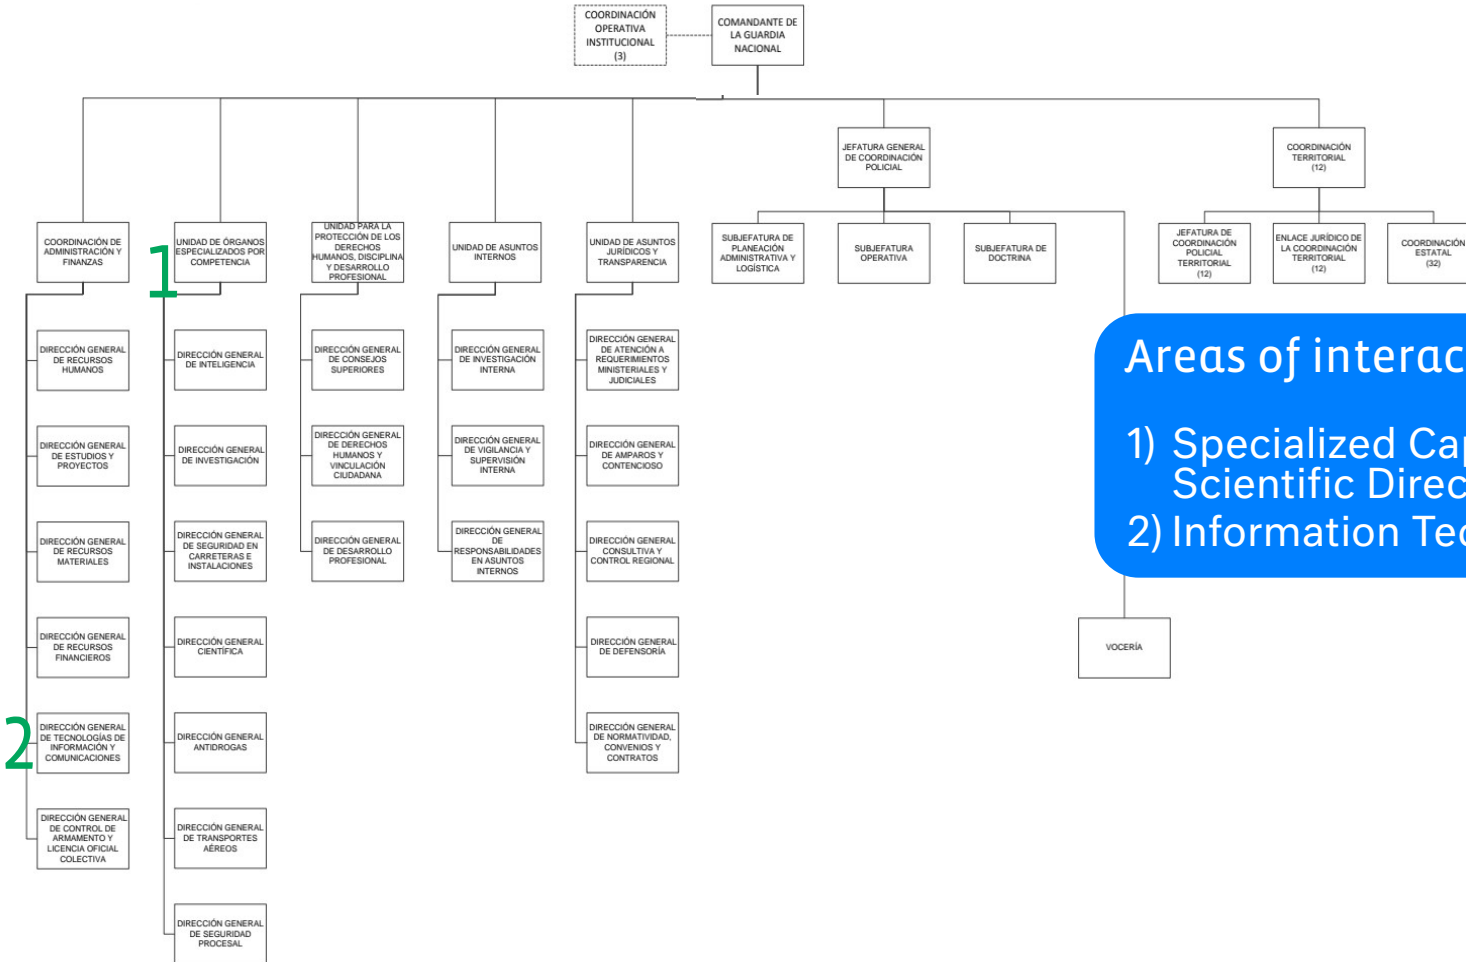

Naval Aeronautics, Oceanography + Meteorology

Communications + Information, UNIPLACE = Strategic Coordination + Planning Unit

SECRETARÍA DE MARINA
OFICIALÍA MAYOR

SSCP

Areas of interaction for Virginia Companies

- 1) Specialized Capabilities Units, especially the Scientific Directorate, Air Transport
- 2) Information Technology + Communications

Suppliers (per Compranet)

Bittium

AIRBUS

Foreign competitors in Mexico

Drone producers + services

US Collaboration (via D.C.)

Networking opportunities

FAMEX

First major defense + aerospace show in the world since pandemic

Largest aerospace and defense trade show in Latin America

Organized by the Mexican Secretariat of Defense

4th Edition 2021: USA is Honored Country Partner

US Pavilion (Kallman Worldwide) works with US Embassy on networking

Takes place at the Queretaro Airport

April 20-23 dates align with the VEDP Mexico trade mission

COUNTRIES

EXPO SEGURIDAD

April 13-15 (also aligned with VEDP 2021 trade mission)

Strong US presence, with Embassy-supported networking

Good for distro/integration partner recruitment

Centro Citibanamex, Mexico City

Reed Exhibitions

Currently hosting interesting pre-show virtual events

Mexico market entry

Validate the market

- Confirm that demand exists for what you offer

Measure + project the market

- How much return on investment should you expect from Mexico market entry?

Every exporter will find its own way to blend direct support from home with local support in Mexico.

Mexico market SWOT

Strengths

- Proximity, bilateral + multilateral cooperation with US + UN
- National Development Plan 2019-2024 seeks to enhance the response capacity of the Armed Forces in matters of security

Opportunities

- Aircraft replacement and purchases of the SEDENA and SEMAR.
- Diverse functions of SEDENA
- Increasing openness to work with contractors at SEDENA + SEMAR
- National Guard a new policing body, ongoing subnational police reform

Weaknesses

- Mexico police + defense spending very low, has not developed internal management infrastructure to work efficiently with complex supply capabilities (ie services)
- Military often dependent on ODC / FMS for training + more complex comms like those Virginia is good at

Threats

- Foreign defense companies have better established presence than US companies
- Weak administrative culture / processes at SEDENA often lends itself to corruption

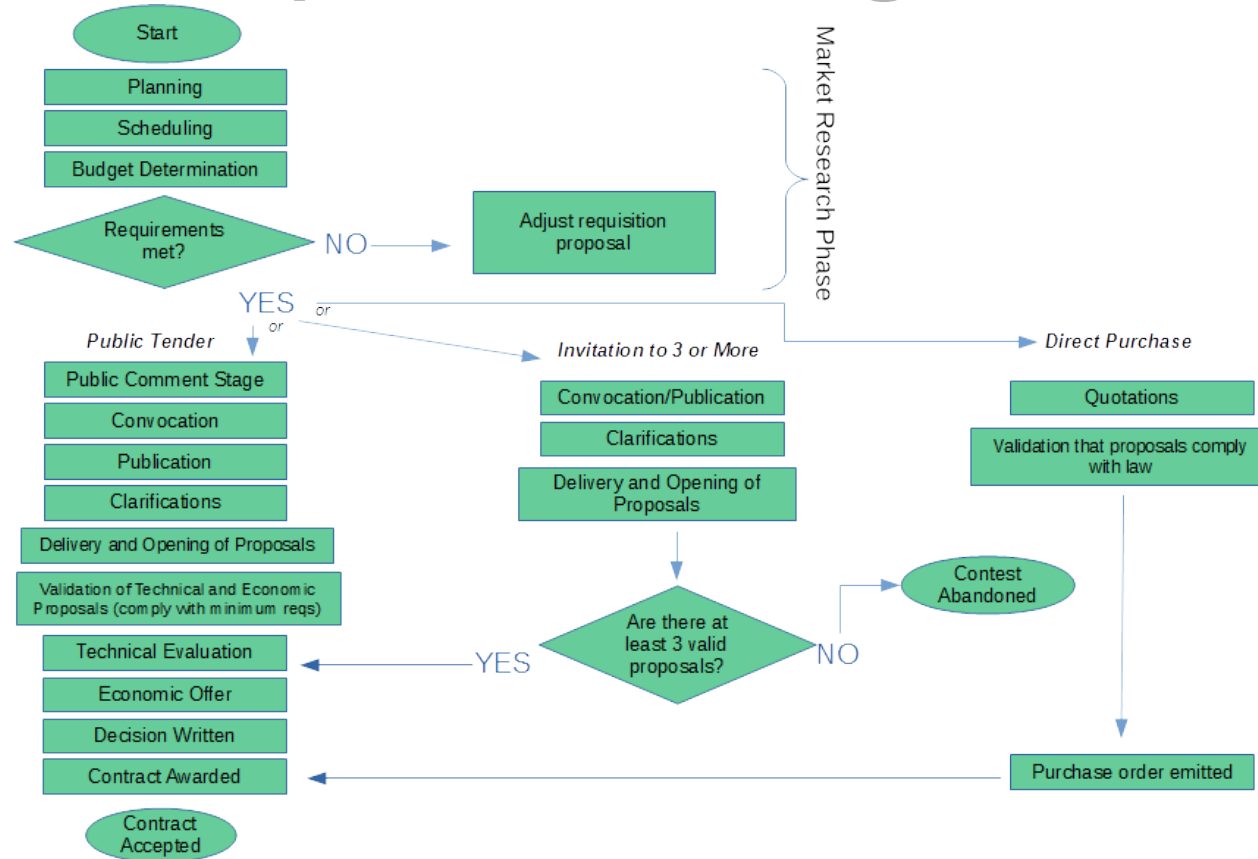

Don't be deceived by Mexico's proximity:

US companies commonly try to run Mexico sales development from home or, assuming they can play a major role from home, through tenuous local alliances. We also see many hoping to turn the US Embassy's market access services into BD proxies, which for Mexico is against US policy. We have conferred with the State Department, Department of Commerce, and DOD on this matter repeatedly. We all agree the competition from locally established foreign companies is normally too stiff for US co's to sell to Mexico customers without at least a well-vested local partner relationship.

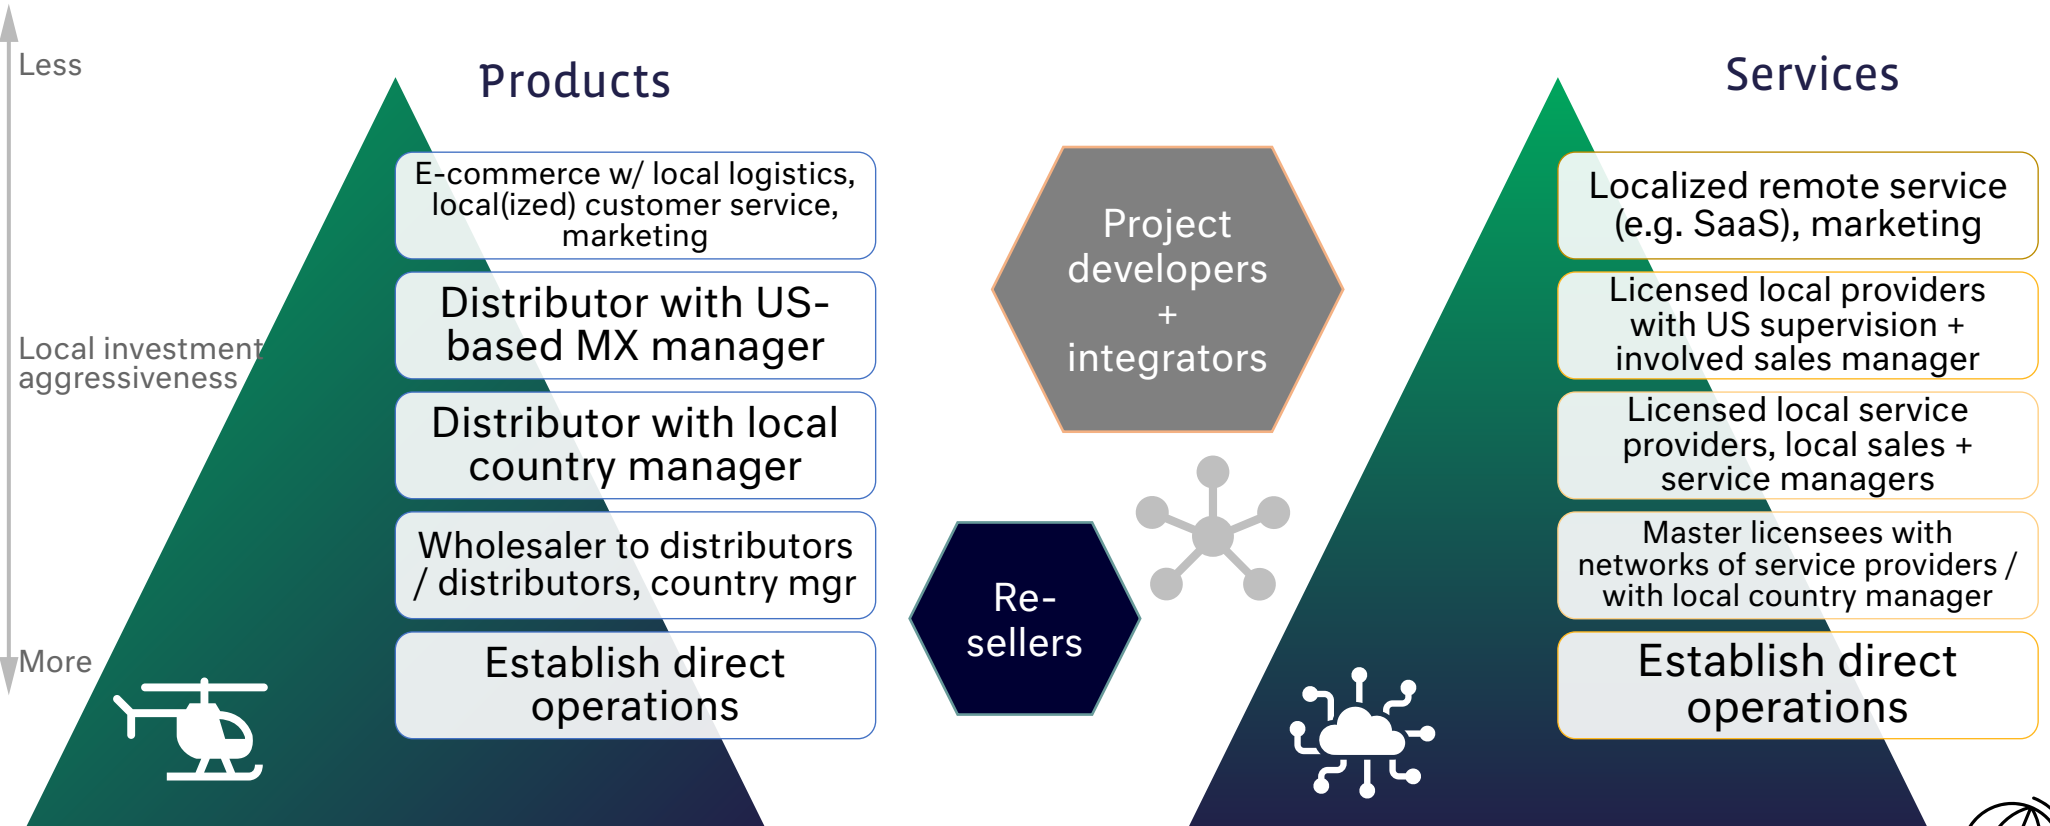

Government purchasing

- Budget planning typically August-October; FY = calendar year
- Long payment terms; local partner often responsible for financing
- High-touch sales processes
- compranet.gob.mx = MX government purchasing database
- Spanish documentation

Market entry investment spectrum

Contributions in a partnership

Your partners take care of customers

1. Financing customer payment terms
2. Local fiscal processes
3. Logistics across border + within Mexico
4. Market intelligence
5. Existing relationships
6. Sales initiation + closure
7. Adding value to deliverable
8. Customer feedback
9. Pricing elasticity judgment
10. Making good on product + service guarantees

You take care of the product /service

1. Marketing
2. Know-how on your value proposition
3. Best practices on delivery + integration
4. Direction + incentive
5. Support on sales + business case alignment
6. Ownership of, responsibility for permissions + IP
7. Logistics to border
8. Financing anything that remains yours absent a sale

Final thoughts

- It takes a concerted sales + marketing plan to successfully enter in Mexico
 - Well-informed: really digest + try to get to know Mexico, or hire someone in charge of knowing it
 - Funded by company resources, NOT an advance on anticipated Mexico sales
 - Flexible
 - With metrics
 - Follow + continually update the plan
- Mexico sales, like all international sales, are an investment
 - Have expectations for ROI: source, timing + amount
 - Look for how to eliminate, decrease or mitigate against risk + volatility
- Good relationships are fundamentally necessary
 - What do you offer that locals don't?
 - What do locals offer that you don't?
 - Create “win-win-wins” for partners + customers
 - Communicate well + often
- VEDP's next Mexico Trade Mission is well timed with 2021 FAMEX + ExpoSeguridad events
 - Companies may take advantage of VEDP mission virtual meetings surrounding in-country events, exhibiting independently in those events
 - Register for the mission [here](#)

Sales to MX government are expensive: build cost into pricing (or let your local partner do so)
